Start your own open source sportsbetting and casino portal in just a few days with our turnkey and ready to go system. If you buy a white label casino setup you will not actually own your own players and you will not have the opportunity to set your own rules and the money is not handled by you. This setup allows you to be in 100% control since all payments will go to you instantly, the players sign up on your system and you have full control over the structure, design and every aspect of the system.

The system can be installed instantly and from there you can redesign and change everything as you like, there are no encryptions and you will have the sportsbook already in the setup including Live odds and casino games.

Imagine your own sportsbetting system with casino at NO monthly cost, the only 3:rd party cost would be your choice of server, that's it - you will keep 100% profit on all player losses and you can even tweak the winning percentage settings to keep full control of the player flow.
